## READING ALOUD EVERYONE CAN!

### READING ALOUD? EVERYONE CAN!

Sometimes parents feel that they are not such good readers or that reading aloud costs too much time. Or they think that reading is no longer necessary if children can read themselves. The opposite is true! Reading is important for language development at any age. It means also a moment of rest with your child. I would like to give you these 5 tips:

1. Read or view the book yourself first so that you know what is coming.
2. Choose a fixed time, for example before bedtime.
3. Reading the same book more often is not a problem, especially young children enjoy repetition.
4. Don't skip difficult words, sometimes you can explain a word but you don't always have to.
5. If you read more easily in your own language, feel free to do so.

Reading aloud for fifteen minutes a day ensures that your child learns 1000 new words per year!

### READING TIP

Mol viert kerstmis / Marieke van Hooff - from 3 years old

Mol has invited all his friends to the Christmas party. But then everything goes wrong. Can Mol still save the Christmas party?

Many more Christmas and other books you can find in the youth department in the library in the Witte Dame. Just in time for the winter period, our collection of picture books has been thoroughly renewed and expanded. Enough for many hours of reading pleasure!

### KIDSWEEK JOKES APP

Kidsweek is the newspaper for children from 9 years old. Besides the world news, there is of course also a page with fun facts and jokes. Recently there is also the Kidsweek Jokes app with many jokes and riddles. You can also submit your own joke. Perhaps your joke may soon be in the newspaper!

The app is free to download for [Android](#) en [iOS](#).

### CHILDREN FREE MEMBERS OF THE BIBI!

Did you know that children up to the age of 18 are members of the Eindhoven Library [for free](#)? Give your child the best books and enable a lifetime pleasure in reading and learning. There is a world to discover in the library!
