PLEASURE IN READING

The most beautiful moments with a read aloud book

With a picture book you get so much more than just a book. It's the start of having a wonderful moment with your child. A good start to a fun, daily ritual between child and (grand)parent. Anyone who picks up a picture book today, can have one of those wonderful read aloud moments as early as tonight. Don't know which books to choose? We'll give you a hand. During The National Reading Days, from January 25 through February 4, come to our library, pick out a big pile of (picture) books, come listen to great stories or watch fun shows. Check out all activities and tips on bibliotheekeindhoven.nl/de-nationale-voorleesdagen

MEDIA LITERACY

Picture books in all languages

Reading aloud is good for everyone, and it can be done in any language. When you read aloud in the language you know well, you give your child the best input. Reading aloud allows you and your child to enjoy a story and engage in language together: learn new words, but also talk together about the story or your own experiences. On www.prentenboekeninalletalen.nl you can find picture books in more than 20 different languages. Fun to listen together and then talk about the story. Especially fun if you also have the book with the drawings to look along while listening to the story. Come borrow it at the (school) library.

TIP FROM THE LIBRARY

Give a book as a gift!

The campaign "Give a (picture) book as a gift" has the mission to let all children in the Netherlands and Flanders (part of Belgium) grow up with access to the most beautiful books. How wonderful would it be if every child had his or her own collection of the best children's books in his or her room - with the result that books would have a permanent place in his or her life? The children's book of 2023 is *Dolfje Weerwolfje* by Paul van Loon. Starting Feb. 10, this beloved book will be on sale in bookstores for only €2.99.
